DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-59 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamamoto et al EP 1215310.

Yamamoto et al. discloses a process of preparing a p-type zinc oxide semiconductor material including obtaining a self supporting substrate surface, and depositing a thin film of zinc oxide which is doped with one or more p-type dopants on the substrate under conditions which the zinc atoms, oxygen atoms and p-type dopant atoms are combined as the thin film, wherein the resulting thin film is a persistent p-type semiconductor and the p-type dopant concentration is greater than about 10^{16} atoms- cm^{-3} and wherein the semiconductor resistivity is less than about 0.5 ohm-cm, also disclosed is the p-type dopant is from the group V elements, and the various techniques used for the deposition (see paragraphs 6-16 and 29-36).
